EDUCATION

Lassonde School of Engineering, York University

September 2021 – April 2025

Bachelor of Engineering in Software Engineering (B.Eng)

Toronto, ON

Relevant Courses:

Advanced Object Oriented Programming, Fundamentals of Data Structures, Introduction to Embedded Systems

EXPERIENCE

Software Development Project

January 2023 – April 2023

Lassonde School of Engineering, York University

Toronto, ON

- Developed a desktop app in Java created based on the needs and requirements of a client
- Followed deadlines and gained experience working on a software development team
- Learned and implemented new coding techniques and algorithms I had never seen prior
- Familiarized with GitHub collaboration

Founder/Owner

May 2017 – August 2022

Saheb Photographers (sahebphotographers.ca)

Toronto, ON

- Founder/Owner of Saheb Photographers, a Real Estate photography business primarily in the GTA
- Spoke to clients over the phone and in person to ensure their needs were met
- Created and provided different plans and packages to ensure all clients are satisfied
- Familiarized myself with photography and photo/video editing to provide a high quality service
- Organized my time and ensured all orders were fulfilled within 1-2 business days (or sooner per request) while also balancing schoolwork
- Designed a google website and registered the business with google to allow for more exposure and legitimacy
- Created and sent out invoices to clients through PayPal to allow for multiple professional payment methods

Warehouse Associate

August 2020 – October 2020

Ecotherm Inc

Newmarket, ON

- Packaged product and helped manage incoming and outgoing deliveries
- Assisted in general warehouse maintenance and organization

Sales Associate

September 2019 – August 2020

Edible Arrangements

Newmarket, ON

- Worked in a fast paced high stress busy environment managing hundreds of orders a day
- Maintained quality and ensured customer satisfaction
- Spoke to customers over the phone to manage existing orders or place new ones
- Entered customer and order information into the computer system creating and managing tickets
- Prepared fruit and built fruit baskets/boxes to be sent out for pickup or delivery

PROJECTS

YULookUp | Java, MySQL, Gradle, JavaFX, GitHub

January 2023 – April 2023

- Developed a desktop application in Java working on both front and back end
- Created a GUI that is simple yet effective and easy to navigate increasing student efficiency when browsing for courses by 40%
- Populated MySQL database with courses from university website using webscraper

TicTacToe | Java, GitHub

February 2023

- Developed a very simple Tic Tac Toe game
- Playable against friends or CPU with randomly generated moves
- Implemented high level coding techniques and efficient algorithms
- Simple yet effective demonstration of coding level
