EDUCATION

Bachelor of Engineering (B.Eng) - Software Engineering

Sep 2021 - Present

Lassonde School of Engineering, York University

Toronto, ON

SKILLS

Programming Languages Python | Java | Groovy | TypeScript | C# | C++ | JavaScript | SQL | Bash | HTML/CSS
Technologies GCP | AWS | Azure | .NET | React.js | Node.js | Docker | Jenkins | CI/CD | Git | MySQL

EXPERIENCE

Software Engineer Intern

Sep 2025 - Present

Kinaxis

Ottawa, ON

- Built and maintained **Jenkins CI/CD pipelines (Groovy)** leveraging ephemeral VMs on **GCP** to automate functional testing (AFT), reducing manual test execution by **70%** and improving feedback time by **40%**.
- Developed and maintained full-stack internal web applications to **streamline** cross-team testing and release processes by **60%** using **React, C#, .NET**, and **CloudSQL**, automating build, test, and deployment via **GitHub Actions** and **GCP**.
- Optimized distributed test execution workflows by improving job **parallelization** and **resource allocation** across **Jenkins** pipelines and **GCP** compute engine instances, reducing total pipeline runtime by **25%**.

Software Engineer Intern

Sep 2024 - Apr 2025

Mely.ai Solutions Inc.

Montréal, QC

- Engineered features for an **AI-driven** SaaS platform that automated document processing workflows, reducing manual data entry time by **80%** using **C#, Python, JavaScript**, and **Vue.js**.
- Boosted backend performance by **40%** through **PostgreSQL query optimization**, indexing strategies, and **API** refactoring to reduce database latency.
- Improved product stability by implementing **unit tests** and proactive edge-case detection, reducing bug resolution time by **30%** while independently performing **QA testing and validation** alongside development in an Agile startup environment.

k2i Academy Program Mentor

May 2024 - Aug 2024

Lassonde School of Engineering, York University

Toronto, ON

- Led a research team of 5**, providing **technical mentorship** in software development by assisting with programming languages, debugging, and overcoming coding challenges.
- Guided research initiatives centered on the **UN Sustainable Development Goals (SDGs)**, mentoring teams through the definition of **core objectives** and **timeline management** while also maintaining high academic standards.
- Developed a **Python**-based analysis tool using Pandas and Matplotlib, reducing manual data processing by **40%** and improving research accuracy.

PROJECTS

FileWhisper | AI Document Q&A SaaS Platform

Mar 2026 - Present

AI/ML | TypeScript | Next.js | tRPC | LangChain | Pinecone | Prisma | Tailwind | Stripe

Toronto, ON

- Built a **full-stack SaaS platform** that allows users to upload documents and query them using an **LLM** that generates answers strictly from the uploaded document content.
- Implemented a **retrieval-augmented generation (RAG) pipeline** using **LangChain** and **Pinecone** to embed, index, and retrieve document data for contextual LLM response.
- Developed the application using **Next.js App Router**, **TypeScript**, **tRPC**, and **Prisma**, with streaming API responses for real-time chat interactions.
- Implemented **authentication** and **subscription management** using Kinde and Stripe, supporting free and paid plans.
- Designed a responsive UI using **Tailwind** and **shadcn-ui**, including drag-and-drop document uploads, a PDF viewer, and optimized chat performance with infinite message loading.

PCPartly | E-Commerce Platform

July 2024 - Aug 2024

TypeScript | React | Node.js | Express | MongoDB

Toronto, ON

- Developed a **full-stack e-commerce platform** supporting product listings, user authentication, and order management.
- Implemented secure authentication using **JWT** and **Bcrypt** for session management and password security.
- Deployed the application on **AWS (EC2)**, enabling scalable hosting and reliable deployment.
